PROJECTS

Pocket Plants

Full Stack Developer

A pocket plants is an application that uses image recognition in determining herbal plants that can be used as an alternative medicine for cough and flu. It lets the user take a picture of a herbal plant and display what kind of plant based on the learned plants of the algorithm in the application.

NumSum Calculator

Full Stack Developer

A NumSum Calculator is an application two main functions. First is the IEEE converter that lets the user input any number and convert it into 32-bit and 64-bit binary. Last is the Root Finding that finds the root of the equation given by the user.
